Gebauer SLc Precision and Reliability

- The Gebauer ***precision engineered heads with pre-mounted blade and suction ring*** provide the desired flap thickness and hinge size with minimal tolerances, resulting in **predictable and repeatable outcomes with maximum safety**.

- The advanced ***SLc Hand-Piece with two microprocessor controlled motors*** operated by an ergonomic foot pedal ensures a consistent dissection each and every time, providing **repeatable motionless handling throughout the entire procedure**.

Gebauer SLc Ease of Use

- With the ***Click-and-Go principle***, Gebauer has facilitated SLc users with a unique, easy and intuitive setup process each and every time, resulting in **shortest preparation time between surgeries, higher patient turnover, no errors in setup process with quick user-friendly learning curve for personnel**.

Gebauer SLc Flexibility

- The SLc features a range of ***Single-Use-Sets*** for LASIK, Thin-Flap-LASIK, SBK, Epi-LASIK, ASA and PRK complete with various ring options for individual patient requirements, thus allowing an impeccable customised flap for each eye. **The SLc is the one system that meets all procedure requirements and patient needs**.

- The Gebauer SLc is a ***unique design for potential advancements and evolving procedures*** in refractive surgery that offers the potential for upgrades at a later stage throughout its life cycle, **thus making the SLc a sustainable long term investment**.

- At Gebauer we recognise the importance of a quality ***Customer Support Service***. We provide a comprehensive and efficient in-house training programme at your facility for everyone who works with the SLc system. **Gebauer offers a dedicated technical support in all aspects including inspection and repair service.**
